

11-05-XX. Use of the Street Utility Infrastructure Fund. The Street Utility Infrastructure Fund shall be responsible for maintaining the upkeep and repair of the public streets and alleys, including but not limited to graveling, patching, crack sealing, joint sealing, seal coating, milling, overlaying, full depth reclaiming, soil stabilizing, reconstructing, spall repair, slab stabilization, partial-depth repair, full-depth repair, dowel bar retrofit, diamond grinding and grooving of the roadway **as part of a capital project**. The fund shall also be used for curb replacement, pedestrian accessible ramp replacement, inlet and manhole repairs, underdrain systems, tree pruning, signing and pavement marking and other treatments to improve the safety and operations of the existing roadway network **as part of a capital project**. The fund shall be responsible for payment of street maintenance special assessments existing at the time of initial adoption of this ordinance. All property owner street maintenance special assessments shall be forgiven as of the implementation date of the fee. The City Commission is authorized to issue regulations not inconsistent with this chapter to further define such terms as may be necessary or desirable for the administration of this chapter, and to establish additional procedures as may be necessary or desirable for the administration of this chapter.
