

# OTTAWA STREET PROJECT SUMMARY

## WELCOME!

Thank you for joining us at the Ottawa Street (HC 174) Reconstruction Project public input meeting. Your feedback is essential in shaping the final design. We appreciate your participation and look forward to your input!

## ABOUT THE PROJECT

Ottawa Street (HC 174) Reconstruction upgrades are anticipated to include a new roadway with lighting for improved safety and accessibility, new stormwater systems for enhanced drainage, pedestrian facilities, and convenient access to nearby businesses.

## TIMELINE

Construction is anticipated in 2026. The City will provide regular updates to keep the community informed throughout the design and construction of the project.

## LOCATION

The Ottawa Street Reconstruction (HC 174) project is located in north Bismarck, approximately 1,000 feet north of 43rd Avenue NE to Canada Avenue.

## DESIGN ALTERNATIVES

After meeting with property owners along the corridor, two design alternatives are being considered in the preliminary design phase of the project. Both options include upgraded lighting, stormwater enhancements, curb and gutter, and sidewalks on both sides of the street.

- Option 1: A 32-foot, two-lane urban roadway without on-street parking.
- Option 2: A 40-foot, two-lane urban roadway with on-street parking on the east side of the corridor.

## PROJECT FUNDING

This project will be funded by an assessment district and City participation, pending approval by City Commission through the budget process.

### Preliminary Estimates

- 32-foot roadway - \$4,165,000
- 40-foot roadway - \$4,255,000

The City of Bismarck is considering two design alternatives for the Ottawa Street (HC 174) Reconstruction Project. Share your feedback through our public input survey before Friday, April 4.
